EXPERIENCE

Full Stack Developer Intern

WYND Technology

June 2025 – August 2025

- Developed PEAN stack features (PostgreSQL, Express.js, Angular, Node.js) for a production project.
- Built UI components and backend API routes, improving reliability.
- Assisted in manual testing and debugging, ensuring smooth deployment.

PROJECTS

GATE Assistant

- Web platform for GATE exam preparation with responsive Angular-based UI.
- Implemented performance charts for student progress tracking.
- Integrated REST APIs for tests, scores, and user progress.
- Added basic authentication for secure user access.

Ward Connect

- Community platform providing ward-level updates and service access.
- Developed frontend using Angular + SCSS with clean reusable components.
- Designed UI workflows and prototypes using Figma.
- Connected services using REST APIs, data stored in PostgreSQL.

Portfolio Website

- Personal portfolio built with Angular + SCSS to showcase skills and projects.
- Implemented fully responsive design for mobile and desktop.
- Hosted live using Vercel for fast deployment.
- Managed version control using Git and GitHub.

Login Page

- Simple authentication module built using Angular reactive forms.
- Implemented basic JWT-based login flow.
- Integrated with Express.js backend for validation and user sessions.

SKILLS

Programming Languages: Javascript | C | python

Frontend: HTML5 | CSS3 | SCSS | JavaScript | Angular | Responsive Design

Backend: Node.js | Express.js | REST APIs

Databases: MySQL | MongoDB | PostqreSQL

Tools Platforms: Git | GitHub | Heroku | JWT Basics

LANGUAGES

English
